

INTEOS® HCSac 3.5 Clavicula Hookplate  
Anatomically optimized clavicle plate system

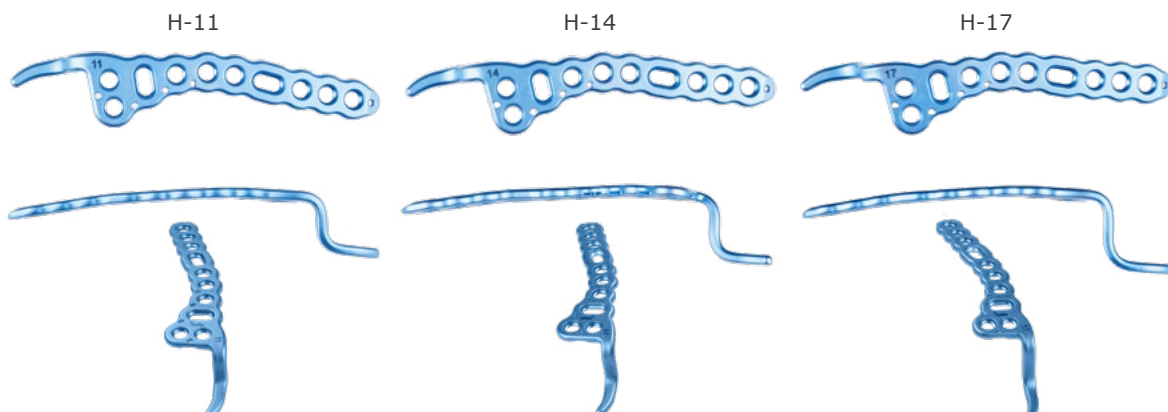

# Advantages of the INTEOS®

## HCSac 3.5 Clavicula Hookplate

The INTEOS® HCSac 3.5 clavicle hook plate is the solution for the fixation of lateral clavicle fractures and injuries of the acromioclavicular joint. The anatomically correct fit with various hook heights as well as the **angle-stable & polyaxial** plate-screw connection characterize this plate from Hofer Medical Solutions.

- + Precise anatomical pre-bending of the plate for the surgical therapy of lateral clavicle fractures
- + A motionally stable and anatomically correct reconstruction is made possible, which allows early functional movement.
- + Three different hook heights with 11, 14 and 17mm are available
- + Up to 4 different plate lengths in left and right versions for optimal adaptation to the patient's anatomy
- + Elongated holes for positioning the plate in the medial-lateral and anterior-posterior direction
- + Special hook shape, curved and rounded anteriorly to support and protect the supraspinatus.
- + Fully retractable screw heads with high polyaxial angular stability
- + Minimized soft tissue irritation thanks to the rounded geometry of the plate and deep-seated screw heads
- + Angle-stable and polyaxial locking mechanism
- + System added value: compatible with screws and instruments of the INTEOS® 3.5 System

## L INTEOS® HCSac 3.5 Clavicle Hookplate H-11 as av

Plate thickness 3.0 mm  
 Compatible to:  
 Shaft area: INTEOS® 3.5 screws / ForceDRIVE 10

Titanium	Number of Holes	Hook Height	Length	Side	PU
750-100-110-005	5	11	68 mm	left	1
750-100-110-006	6	11	76 mm	left	1
750-100-110-008	8	11	96 mm	left	1

## creating partnership

For us, a partnership is the result of a long and happy relationship in all areas of our work. Reliable bone healing for patients, optimal handling of the systems for surgeons and surgical personnel, as well as the simple preparation of the instruments, constantly strengthen this partnership.

For us, "creating" means more than just finding solutions in the form of innovative products.

It is the result of high standards, constant development, innovative products and excellent service for patients, surgeons and surgical personnel around the clock.

Please do not hesitate to contact us if you have questions about our company, our employees or our production methods.
