

INTEOS® Clavicle 3.0 & 3.5 superior, lateral  
innovative lateral clavicle plate system

# Advantages of the INTEOS®

## HCSlat 3.0 & 3.5 Clavicle Plate sup. lat

The INTEOS® HCSlat 3.0 & 3.5 Clavicle Plate sup. lat. enables a stable osteosynthesis treatment of lateral clavicle fractures on the proven basis of the angle-stable & multidirectional plate-screw connection from Hofer Medical Solutions.

- + Exact anatomical preforming of the plate
- + The special design offers the possibility to insert up to nine screws into the lateral part of the plate in order to achieve a stable osteosynthesis of the lateral fragment
- + Different plate lengths for optimal adaptation to the patient's anatomy
- + Fully retractable screw heads with high multidirectional angular stability
- + Minimized irritation of the soft parts thanks to the geometry of the plate and the flat screws
- + Angular stable and multidirectional locking mechanism
- + System added value: Compatible with screws and instruments of the INTEOS 3.0 & 3.5 system

## creating partnership

For us, a partnership is the result of a long and happy relationship in all areas of our work. Reliable bone healing for patients, optimal handling of the systems for surgeons and surgical personnel, as well as the simple preparation of the instruments, constantly strengthen this partnership.

For us, "creating" means more than just finding solutions in the form of innovative products.

It is the result of high standards, constant development, innovative products and excellent service for patients, surgeons and surgical personnel around the clock.

Please do not hesitate to contact us if you have questions about our company, our employees or our production methods.
