

INTEOS[®] Radiussystem 2.5

Delicate and extra flat design

Advantages of the INTEOS® Radiussystem 2.5

The new INTEOS® radius system from Hofer Medical Solutions is characterised by its delicate design, while maintaining maximal stability. Determining factors for this are the minimised screw diameter and the curved outline of the shaft.

- + Extra flat, distinctive design
- + Anatomically optimized and preformed plate geometry
- + Versatile, near-joint screws placement options
- + Fully retractable screw heads with high polyaxial angular stability
- + Some special plates of the INTEOS 2.5 Radius System already indicate the correct deflection of all screws in the distal and proximal row
- + Highest stability through „3rd point support“
- + Sufficient Kirschner wire holes for temporary fixation of the plate to the bone
- + Numerous „slim“ and „extended“ variants help to find the correct plate size for the patient

creating partnership

For us, a partnership is the result of a long and happy relationship in all areas of our work. Reliable bone healing for patients, optimal handling of the systems for surgeons and surgical personnel, as well as the simple preparation of the instruments, constantly strengthen this partnership.

For us, "creating" means more than just finding solutions in the form of innovative products.

It is the result of high standards, constant development, innovative products and excellent service for patients, surgeons and surgical personnel around the clock.

Please do not hesitate to contact us if you have questions about our company, our employees or our production methods.
